In the latter half of 1984, the strong German Master, Stefan Bucker, (1.M. Elo
2400) has begun to play the S.C.A. on occasions and here are some of his games
and comments, summing up his very recent experiences with this system!

a) From Diagram 1:

6 Bd3 e5 7 Ne2 d5 8 exd5 Nxd5 9 0-0

- i) 9... Nc6 (the traditional move) 10 Nxd5 Qxd5 11 a3 Ba5 12 b4 Bc7
13 Nc3 Qe6 14 Be4(!) TN
A recent improvement tried in a game Flio/Bucker which seems more
challenging than 14 Nb5(Bb8) or 14 Qh5(Qg4) Bucker was dissatisfied
with his reply 14 ...0-0 and later suggested the following possible
alternatives: 14 ...Ne7(→...f5), e.g. 15 Bg5 0-0 16 Bxe7 Qxe7
17 Nd5 Qd8 / or 14 ...Nd4

or ii) 9...Nxc3 (a later improvement on the above played in the same
tournament in Poland: Gizynski/Bucker 10 Nxc3 Be6 11 Qh5 Nd7 12 Rd1 a6
13 Be4 Qc7 14 Nd5 Bxd5 15 Rxd5 Be7 16 Bg5 g6 17 Qh6 Bxg5 18 Qxg5f6
19 Qe3 0-0 20 Rad1 Rf7 21 Rd6 Kg7

b) From Diagram 5: (but with black pawn on f7 instead of f6)
Bucker draws attention to 8 ...d6!? which he played against Wiemer
(Tecklenburg 84). The game continued 9 Nxd5? Bxd2+ 10 Kxd2 dxe5 11
Nf6+ Qxf6 12 Nf3 (0-1, 18)

- i) If 9 exd6 Qxd6? is wrong but 9... Bxc3! 10 bxc3 e5 11 Nf5 Bxf5
(11 Qe4? Nf6) 12 Qxf5 Qxd6 acc. to Bucker presents no problems and
gives Black good play.
- ii) 9 Bh6?! - probably this has to be tried, but Black's exchange sac
presumably yields adequate counter play after 9 ...g6 10 Bxf8 Qxf8
11 Nb3dxe5 12 Qg3 Nc6

c) From Diagram 1:

6 e5 Nd5 7 Bd2 Nxc3 (7...Bxc3 8 bxc3 Qh4 see tape) 8 bxc3 Be7 9 Qg4.
From this position Bucker rehabilitates the "old" move ...g6 with an
entirely new conception: - Black prepares for0-0-0!?

Here is some of his suggested analysis in support of his theme:(I translate
directly from his recent letter)

10 h4 h5 11 Qg3 a6 12 Bd3 Rg8!? (after h4 White has his own weaknesses which
make it difficult for him to 0-0 and all in all Black has adequate counter-
chances with definite targets on e5 and c3 to aim at) 13 f4d6 14 Nf3 Bd7
(→...Bc6) (if 14 Rb1 Nd7→...Nc5 or Bd7→ c6 or ...Nf8)

Bucker then goes on to suggest a couple of possible improvements for White:

- 1) 13 Be2 (instead of f4) d6 14 exd6 Bxd6 15 Bf4 with equal chances -
Black's defence is solid.
- 2) 13 f4d6 14 exd6 (instead of Nf3 as above)
Bxd6 15 0-0 Be7 16 Be1 - again N
- 3) Bf4 Nc6 14 Nxc6 dxc6 15 Be4 Bd7 16 Rb1 Rb8→...g5,...Kf8 possibly
(Ed.Basman)

Also From Diagram 4: 8... Qh4(cp Game7 Portisch/Bilek) and now if 9 Qf3 Nc6
Even simpler for Black may be 9...0-0 →...f6 (Basman) 10 Nxc6 dxc6 (10Nb5 0-0)

- a) 11 c4 Qd4
- b) 11 Rb1 b5!? (attempting to consolidate the central N)
- c) 11 g3 Qa4!? (with counterplay on the Queenside)
- d) 11 Bd3 b5 12 a4 Bd7 13 ab cb 14 Qe2 0-0 (again with excellent
counter chances.

The position after Black's 16th move also occurred in a game Sibarevic v Filipovic, Banja Luka 1983 & was agreed drawn. Commenting on White's prospects after 16 Be2, Basman suggests a) 16...PQ4 17 c4+ b) 16...b6 17 f4 Nc6 18 Bf3 Kf8 19 Rd6 Ke7?! 20 Rhd1+ so c) 16...Kf8 17 f4 Nc6 18 Rd6 Ke7 19 Rhd1 would presumably transpose into b. So after the exchange on c3, white has the edge. Black's dark sq. bishop is his trump card & he should hang on to it! (Basman)
